To whom it may concern:

I am writing to recommend the services of the Turnkey Engineering Team. We have been using Turnkey to provide engineering and construction services at PerkinElmer since 2010. Turnkey provides timely and detailed designs that are very constructible as well as cost effective. Turnkey has done large and small tool installations, Hydrofluoric Acid treatment systems, air handler installations and facility retrofits at PerkinElmer. Their knowledge of Codes is second to none, as is their effectiveness as designers.

We also use Turnkey to perform construction scopes. Their installations are *a/ways* on schedule, and of the highest quality. Turnkey works very well with the City building inspectors to obtain quick acceptance and project close-out. I highly recommend Turnkey Engineering Team for both design services and construction.

Rob Kearns
Equipment Engineering and Maintenance Manager
